The eDNA Society Annual Meeting 2021, November 20-21 (JST)

Call for the workshop in the eDNA Society Annual Meeting 2021

The running committee of the environmental DNA Society Annual Meeting 2021 call for proposals for workshops to be held on November 21, 2021 (JST).

The topic of the workshops can be in any field that is related to eDNA. We invite you to take advantage of this opportunity to provide information and discuss topics regarding technical issues, your eDNA projects, and these expected to be applied to eDNA.

The workshops will be held on November 21 from 10:00 to 11:30 (JST), with each meeting lasting up to an hour and a half (can be shorter if necessary). The workshops should be held online, and organizers will be required to set up their own web conferencing system, such as Zoom, to conduct the workshop. The cost of setting up the online system will be borne by the organizers, but this can be negotiated if it is organized by a student member. Within the time frame above, organizers may structure workshops as they prefer, including the number and length of presentations.

Organizers must be members of the eDNA Society and any membership category is acceptable. We are planning to accept a few workshops. If there are many applications, the selection/reorganization might be made by the running committee. The deadline for applications is 17:00 (JST), August 13, 2021, and the notification of acceptance or rejection is scheduled for late August 2021.

To apply, please submit the following information to the meeting office (ednameeting2021@gmail.com).
1. Title of the workshop
2. Name, affiliation, and e-mail address of the organizer
3. Abstract of the workshop (within 150 words in English)
4. Language (English, Japanese, or hybrid)

If you have any questions, please contact the meeting office. For other information about the eDNA Society Annual Meeting 2021, please visit the meeting website (www.edna2021en.com).
